

## [Waterline Alternative Energies](#)

*Waterline Alternative Energies serves the demand for renewable energy sources generated from consumers, businesses and municipalities. We are committed to providing green energy solutions for consumers, businesses and municipalities that are proven and cost effective. We can assist you in developing a green solution which will make your current use of traditional energy more efficient and decrease your cost to operate your home, business or town. There are numerous State and Federal Level rebates for residential, municipal and commercial renewable energy installations such as hydro, wind and solar. Waterline Alternative Energies can guide you through the rebate process to ensure you benefit from these available incentives.*

## [Dawn Solar Systems, Inc.](#)

*Dawn Solar is a solar energy company focused on structurally integrated solutions that reduce energy costs while preserving architectural aesthetics. At its core, the Dawn Solar System absorbs heat generated by the sun shining on a roof (or wall) into a concealed, patent-pending thermal collector from which it delivers heating, cooling and hot water. And because it is hidden, it is protected from the elements which extends product life. The collector system has a 25-year warranty. The system is pre-engineered for each customer's application, making it easy for contractors to install. When combined with photovoltaic (electrical) products, Dawn Solar is the only solar energy system that can heat, cool and generate electricity from the sun...*
